

**Is your child under 5 years old?  
Have they been unwell for less  
than 28 days?  
Your child could be part of the  
**DUTY** research study!**

(**D**agnosis of **U**rinary **T**ract infection in **Y**oung children study)

Urine infections can be hard to detect in young children. This important research study will help us to understand urine infections in children and how to detect them as early as possible.
