

DUTY STUDY TRAINING OPPORTUNITIES

Training in DUTY study methods

The next DUTY Study training day, which will offer comprehensive training in all of the study methods, will be held on 21 September 2010, in Bristol. This day is geared towards Nurse / CSO Recruiters but GPs are also welcome. If you would like to attend please contact Catherine Derrick on 0117 331 3814, or by e-mailing catherine.derrick@bristol.ac.uk.

The DUTY study team may also be able to provide 1:1 training in study methods if it is not possible for you to attend a study training day. Please contact Harriet Downing on 0117 331 3811, or by e-mailing harriet.downing@bristol.ac.uk, if you would like to discuss further.

We would also like to hear from you about any other training needs that you identify through your participation in the study (e.g. informed consent for paediatric studies). Please get in touch with Harriet for any other training matter related to your involvement in DUTY.

ICH-GCP training

Clinical studies should be carried out according to International Conference on Harmonisation (ICH) / WHO Good Clinical Practice (GCP) standards. The DUTY study team advocates that all participating researchers have undertaken this training within the last 3 years .

For recruiters within PCTs co-ordinated by the Bristol centre, ICH-GCP refresher training courses are provided by the WCLRN and the latest booking form (which must be e-mailed to Hope Douglas, hope.douglas@uhbristol.nhs.uk) is available by [clicking here](#).

Your local study team will be able to advise you about other sources of GCP training, including on-line training and courses provided by hospital trusts.
